

## Construction Notice - Capital Line South LRT

### Overnight work will continue at 23 Ave and 111 Street

EllisDon, the City's construction manager for early works for the Capital Line South project, has obtained an extension to their overnight noise permit (BYLAW NO. 14600). This extension allows crews to continue working 24-hours per day, if required, until September 2023 at the 23 Ave and 111 Street intersection. Working overnight minimizes daytime traffic impacts to the area. Ongoing construction at this intersection will continue into 2024.

What to expect:

- Crews have been permitted to work 24-hours per day, if required, at the 23 Ave and 111 Street intersection.
- Crews will be excavating areas to construct a drainage lift station for the LRT underpass, and site shafts will be built at the northeast/southwest corners of the intersection.
- Overnight work is permitted at this intersection until September 2023.
- Access to ETS bus stops near this intersection will be maintained.
- Every effort will be made to reduce the impact to the public.
